WFH | Gallery: Your creative colleagues have offices you need to see

University Communications
March 2020

Breakfast bars. Ironing boards. A garage. A "lofftice" (you'll see).

University employees have come up with some rather inventive ideas for making working from home a little more ? sorry ? workable.

Lo Que Pasa figured this would be the case, and we asked for your photos [1]. Just like the pics of pets and kids, there was no shortage of shots of our colleagues' home offices.

We've collected them in this gallery [2]. Have a look ? you might get some ideas for renovating your own space.

And if you want to see how your work space measures up ergonomically, see this related article [3].

For the most updated information about the University's response to the coronavirus pandemic, please visit the COVID-19 information page [4].
