Big Data Computing Workshop, February 7-8

Date::
January 31, 2018

Campus researchers: Up your computational game!

Learn more about Hadoop and Spark for your big data-processing needs. See the **agenda** [1], and **register** [2] to ensure your space.

Nobody knows more about big data for higher-education research than the National Science Foundation's **XSEDE** [3]. Take advantage of this rare opportunity to learn more about working with big data sets in high-performance computing (HPC).

UA researchers needing high-performance computing have resources available at no charge in the **Research Data Center** [4]. Get priority access without dealing with the power, cooling, monitoring, or maintenance overhead by doing a "**buy-in** [5]" on Research Data Center systems. Contact **hpc-consult@list.arizona.edu** [6] with questions or for more information.

Event details:

What: XSEDE HPC Workshop: Big Data
When: Wednesday and Thursday, February 7-8, 9:00am-3:00pm
Where: Main Library, Room 112A
