COVID-19 Updates After the End of the Federal Public Health Emergency

To::
Campus Community
Names and titles:
The University of Arizona

Date::
May 17, 2023

The federal Public Health Emergency for COVID-19 expired on May 11 [1].

To align with this transition, the University has consolidated COVID-19 information on the Campus Health COVID-19 Information and Resource Hub [2], where you will find the latest updates about testing options, vaccinations and what to do if you test positive.

Additionally, please note the following updates:

COVID-19 Testing

- **Cats TakeAway Testing** [3] will end on Friday, June 23.
- The **Campus Health Pharmacy** [4] continues to sell COVID-19 rapid tests and free tests are available at the **Campus Pantry** [5].
- Testing appointments are available through **Campus Health** [6] and the **Pima County Health Department** [7].

COVID-19 Services Insurance Coverage

- The Division of Human Resources has posted information about **insurance coverage** [8] for COVID-19 services under the Arizona Department of Administration health plans (Triple Choice Plan and the High Deductible Health Plan with HSA) and the UA Alternative health plan.
- Note that the COVID-19 over-the-counter test kits purchased after May 11 are no longer covered/reimbursed by those plans. COVID-19 vaccines and boosters are still covered when using an in-network provider or pharmacy.

COVID-19 Mitigation

- Surgical and KN95 masks will be available at no cost at entrances to buildings and in classrooms. Please note that KN95 masks still may be used after the expiration date when stored appropriately and in good condition for fit and function.
- MERV 13 air filters, HEPA filters and emission monitors remain in use.

COVID-19 Dashboard Data

- In the coming weeks, the University will discontinue COVID-19 wastewater testing, vaccine documentation uploads and positive test results tracking.
- The COVID-19 dashboard data **has moved to the Campus Health website** [9] and will be updated through June 23. Afterward, historical data will remain on the site for reference.

Vaccines continue to be available [10] by appointment at Campus Health and throughout the community. As always, if you are feeling ill, stay home and, if you test positive, follow the [CDC’s steps to take when sick with COVID-19][11].
