

Digi Dudes and Tech Divas Summer Camp

Date::

April 23, 2013

What is Digi-Dudes and Tech Divas?

In the past, students have created websites, brainstormed advertising campaigns, developed budgets, learned to do mail merges, designed and drawn store-fronts, planned vacations, recorded and processed audio and made video commercials, just to name a few activities.

Through the use of a wide range of software programs and services, such as Google, Microsoft Office, free editing programs such as Picasa, audio programs such as Audacity and iMovie, photo editing with Photoshop and Adobe After Effects, and web design using Wix campers gained competency in 21st century technology applications. Projects incorporated basic skills in MS Word, Excel and Power-Point as well an emphasis on internet safety and research techniques.

The PDF attachment provides more detail or you can contact our summer programs director Chris Gillett at: gillett@email.arizona.edu ^[1].
