

Video Captioning Webinar on April 12

Date::

April 5, 2018

Due to the new requirements related to the accessibility of the UA's public online content, departments are now responsible for ensuring that public media is captioned. The Disability Resource Center will continue to ensure video material is captioned for individual disability accommodation requests ? including access to both course material and campus events. DRC has worked with the captioning companies to set up several webinars about captioning services.

A webinar on April 12th at 11:00am presented by Automatic Sync Technologies will cover information about how to prioritize your video content for captioning. More information and how to register is listed in the attached PDF.
