

WRRRC Conference 2019 – 'Arizona Runs On Water: Scarcity, Challenges, and Community-Based Solutions'

Date::

December 4, 2018

The conference, presented by the UA's Water Resources Research Center, will run from 7:30 a.m. to 2 p.m. on Friday, Feb. 1, at the Black Canyon Conference Center in Phoenix.

The conference will focus on how Arizona communities are addressing their water challenges through collaboration, conservation, market-based approaches, long-term planning, and more. We are bringing together speakers from across the state to look at place-based approaches. Are there common barriers faced by communities or across water sectors? How do we build on past accomplishments to create new successes? What changes in state laws and governing policies would be helpful?
