Create an accessible, inclusive, and enriching undergraduate research experience.

GET THE CURE: An Introductory Workshop on Incorporating Undergraduate Research into Courses

An Undergraduate Research Experience (URE) is a high-impact educational practice that leads to increased retention, yet many students do not have access to UREs. Want to learn how to incorporate undergraduate research into a course? Attend our upcoming workshop by Sara Brownell, a leading expert on undergraduate research experiences, to learn how to engage more first- and second-year students in this enriching experience. Instructors at all levels and from all fields are invited.

FRIDAY, MARCH 6
Noon – 2:30 pm
Santa Rita Room, Student Union
RSVP by FEBRUARY 25

SPEAKER BIO
Dr. Sara Brownell, associate professor at Arizona State University, is a neuroscientist turned full-time education researcher whose research includes assessing the impact of course-based undergraduate research experiences. Brownell’s work has been highlighted in *The New York Times*, *Scientific American*, and other outlets.

ATENDEES WILL
• better understand course-based UREs.
• learn about URE benefits and pitfalls and about approaches to developing UREs.
• set goals for designing a URE.

AGENDA
11:45 am  Check in + lunch
Noon      Intros + why course-based UREs with example
12:45 pm  Break
1:00 pm   Research + instructional goals
2:30 pm   End
